AI in translation – new tools, new opportunities

Artificial intelligence is changing the way we work. This course will show you how to use AI in everyday translation tasks – from language editing and terminology research to project management. You will work with authentic legal, technical, and marketing texts to gain practical skills you can apply immediately.

What you will learn:

- how to use AI to support the translation process,
- how to apply language editing tools effectively,
- how to research and verify terminology faster,
- how AI can assist with workflow and project organization.

Why join?

- only 4 hours – an intensive, focused training,
- hands-on practice with real texts,
- tools and strategies you can implement straight away.

 Duration: 4 hours

2. AI in Education – Teachers’ Course

Your digital assistant in teaching

AI can make lesson preparation and classroom management much easier. This course shows you how to create lesson plans, quizzes, tests, or presentations in just minutes – and how to personalize learning content for your students’ needs.

What you will learn:

- how to prepare lessons, assessments, and materials with AI,
- how to create engaging content faster,
- how to personalize teaching and develop students’ digital skills,

- how to use AI ethically and safely in education.

Why join?

- practical solutions ready to implement right away,
- tailored to school and academic realities,
- 4 hours of intensive, hands-on training.

 Duration: 4 hours

3. AI for Students

Study smarter and faster with AI

When used wisely, AI can support language learning, exam preparation, and essay writing – provided you use it responsibly. This course shows how AI can enhance your studies rather than replace your own thinking.

What you will learn:

- how AI supports language learning and memorization,
- how it helps with essays, projects, and thesis writing,
- how it can make study organization and exam prep easier,
- how to use AI ethically and responsibly.

Why join?

- simple tools to make learning easier,
- tips to avoid pitfalls (plagiarism, factual errors),
- 4 hours of practical examples and exercises.

 Duration: 4 hours

4. AI for Freelancers

Your digital assistant for freelance work

Freelancers juggle many roles – expert, marketer, organizer. AI can make each of these easier. This course shows you how to use AI to create offers and pricing, communicate with clients, promote your services on social media, and automate time-consuming tasks.

What you will learn:

- how to create offers, briefs, and pricing with AI,

- how AI supports client communication and relationship building,
- how to generate social media and marketing content,
- how to automate repetitive tasks and save time.

Why join?

- tailored tools for freelancers,
- real-life examples from client work,
- 4 hours of intensive, practical knowledge.

 Duration: 4 hours
